👤 PROFILE

I'm Michael Feleke, a fourth-year Software Engineering student at Bahirdar University, with a current GPA of **3.96**. I am deeply passionate about my field and, beyond excelling academically, I actively apply my knowledge to real-world projects. Driven by an unyielding commitment to learning and growth, I am poised to make a significant impact in software engineering. Additionally, I am a skilled React developer and hold a profound passion for utilizing this technology to push the boundaries of innovation. Eager to tackle new challenges, I am excited about the opportunities ahead in my journey as a software engineer.

{ } PROJECTS

Addis Restaurant ✍

Addis Restaurant is a user-friendly React-based web application that simplifies the online food ordering process. Users can effortlessly browse menus, add items to their cart, and place orders for delivery.

TravelTracer-Your-Personal-Journey-Logger ✍

TravelTracer, a user-friendly web application crafted with React, designed to elevate the documentation of users' adventures. Seamlessly log journeys by simply logging in, pinpointing destinations on the map, and embellishing them with personalized notes. Keep travel memories impeccably organized and readily accessible, no matter where users' wanderlust takes them.

Green Star Hotel ✍

Green Star Hotel, powered by React, streamlines hotel operations with essential features such as intuitive room management, efficient booking tracking, secure user authentication, collaborative admin management, and optional dark mode for improved user experience. Simplify tasks, enhance efficiency, and elevate guest satisfaction with Green Star Hotel.

GameVoyage-Creations/ludo_king ✍

Ludo King, a web application game recreated using vanilla JavaScript where users can dive into the excitement of rolling the dice, crafting cunning strategies, and participating in epic battles against friends and family. With every move, users will be transported to a realm of fun and competition, where victory awaits the bold.
